EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Burton A. Amernick, Esq. on 17 January 2007.

The application has been amended as follows: Claim 1 has been amended for clarification by substituting, for the phrase "obtainable by", the phrase --- obtained by ---.

The specification has been amended by adding, on page 4, before the "Detailed Description of the Invention", the following:

--- Brief Description of the Drawings

Figure 1 shows the course of change with time in the result of GPC analysis of samples taken from the polymerization system. ----.

Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the closest prior art as cited teaches chain extended polymers and star polymers, but they are made using branching initiators. The star polymers made by the claimed method differ in both the fact that the branches are of essentially identical length and that the connecting functionalities are different. Applicants' claims are, therefore, both novel and unobvious over the closest prior art as cited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
